

Dura-Whelp® Pad Care & Instructions

Basic Care

* We recommend washing pads before initial use *

- Machine wash on warm, gentle cycle
- Water temperature should not exceed 120 degrees
- Hang to dry or machine dry on a cool, gentle cycle
- Do not over-dry pad
- Shake to fluff

Initial Installation

1. Center pad in whelping box.
2. Attach Velcro from the fastener pack to all four corners of the pad.
3. Clean the floor of your whelping box using a clean rag and rubbing alcohol, allowing to dry completely.
4. Remove the protective film from the adhesive and press firmly onto floor one corner at a time.
